Templyworks

BUNDLE GUIDE · 3 TEMPLATES

Client Machine

Win clients. Run clients. Look professional doing it.

templyworks.com · info@templyworks.com

Notion template · Version Oct 2026

Welcome

Three Notion templates that cover the whole client lifecycle — from first pitch to final invoice. This guide starts with how the three work together, followed by the full guide for each template.

What's in your bundle

Client Pipeline	Find and follow up with leads — contacts, deals, every call and email.
Pitch Kit	Turn interest into a signed proposal — services library, example proposal, proof bank, follow-up scripts.
Client Portal	Deliver the work — milestones, files, feedback and invoices on one shared page.

How they work together

1 **Lead comes in**
Add the person in **Client Pipeline → Contacts** and log the first call or email in the Interaction Log with a follow-up date.

2 **Send a proposal**
Create the proposal in **Pitch Kit**, link services from your library, send it and set a follow-up date. Move the deal to **Proposal Sent** in Client Pipeline.

3 **Deal won**
Mark the proposal **Accepted** and the deal **Closed Won**. Add a project in Client Pipeline → Projects.

4 **Deliver**
Duplicate a **Client Portal** for the client, fill in Project at a glance, add milestones and the first invoice, and share it with **Can comment**.

> **Where to start:** Set up in this order: Pitch Kit services library first (10 min), then Client Pipeline, then one Client Portal per client when you win work.

Each template has its own link in your delivery email — duplicate all three into your workspace. The full guide for each template follows on the next pages.

Notion template · Version Oct 2026

Welcome

Leads, deals, calls and follow-ups in one place — so no warm lead ever goes cold because you forgot to reply.

What's inside

Today's focus	Follow-ups due this week and your open deals, at the top of the page.
Deal Pipeline	A board from Prospect to Closed Won — every deal with value and a next step.
Contacts	Every lead and client. Last Contacted and Pipeline Value fill in by themselves.
Interaction Log	Every call, email and meeting with a follow-up date.
Projects	Work you're delivering for won deals, linked to the client.

Get started in 5 minutes

1. **Duplicate the template**
   Open the template link from your delivery email. Click the ··· menu (top right) and choose **Duplicate** / **Duplicate to my workspace**. Work only in your copy.
2. **Clear or keep the examples**
   Every database ships with a few example rows so you can see how things connect. Look through them, then delete them (select rows → Delete) or overwrite them with your own data.
3. **Favourite the page**
   Click the star (☆) at the top so the template sits in your sidebar. On mobile, it then appears under Favourites.
4. **Add your contacts**
   In **Contacts**, add a row per person with company, email, status and **Source** (where they came from).
5. **Create your deals**
   In **Deals**, add one row per opportunity with **Value**, **Stage**, the linked contact and a **Next step**.
6. **Log your last touchpoints**
   In **Interaction Log**, add your most recent call or email per contact and set a **Follow-up Date**.

> **Good to know:** fields with a formula or rollup fill in by themselves — you never type into them. If one shows empty, the linked data (relation, date or amount) it needs is missing.

How it works

Today's focus

- Shows every follow-up due this week and the deals that are still open.
- Open the page in the morning, clear the list, done.

Deal Pipeline

- Drag cards across stages: Prospect → Contacted → Proposal Sent → Negotiating → Closed Won / Closed Lost.
- Always fill **Next step** — a deal without a next step is a deal you're losing.
- Mark lost deals Closed Lost instead of deleting them — patterns show up over time.

Contacts (automatic)

- **Last Contacted** comes from the newest linked interaction — no manual date updates.
- **Pipeline Value** adds up the value of every deal linked to the contact.
- Open a contact to see its deals, interactions and projects in one place.

Interaction Log

- One row per call, email, meeting or message, with short notes and a **Follow-up Date**.
- Tick **Follow-up Done** when you've replied — it leaves Today's focus.
- Click a Follow-up Date → turn on **Remind** to get a notification.

Projects

- Won a deal? Add the project with dates and budget and link the contact.

Your routine

Every morning (5 min)	Clear the follow-ups in Today's focus.
After every call or email (30 sec)	Log it in the Interaction Log with the next follow-up date.
Weekly (10 min)	Move deal stages and update every Next step.

Pro tips

- Reply within 24 hours — fast replies convert far more often.
- Follow up twice: day 3 "Did this land OK?", day 7 "Should I keep the slot open?"
- Fill Source on every contact — after 3 months you'll know where your best clients come from.

FAQ

Which Notion plan do I need?	The free plan. Every database, formula and view in this template works without upgrading.
Can I rename or add properties?	Yes. If you rename a property that a formula or rollup uses, Notion updates the reference automatically. Deleting such a property breaks the formula that depends on it.
What currency is used?	Amounts are plain numbers, so any currency works. If you want a symbol, open the property → Number format → pick your currency.
Something isn't working?	Email info@templyworks.com with a screenshot. We fix setup problems quickly.

Licence: personal and business use, including work for your own clients. Reselling or redistributing the template is not allowed. Digital product — all sales are final once delivered (you agreed to immediate delivery at checkout). Statutory rights for defective content remain unaffected.

Notion template · Version Oct 2026

Welcome

A Good/Better/Best service library, a fully written example proposal, a proof bank of case studies and ready-to-send follow-up scripts that turn "I'll think about it" into a signature.

What's inside

Today's focus	Proposals to follow up now and your scoreboard, at the top of the page.
Proposals	Every proposal from Draft to Accepted. Open Aurora Studios for a fully written example.
Services Library	Your Good / Better / Best packages, built once, linked to every proposal.
Proof & Case Studies	Wins with problem, result and quote — your "Why me" ammo.
Follow-up Scripts	Copy-and-send messages for every stage of the deal.
The 7-step proposal	The flow every proposal follows, with what to write in each step.

Get started in 5 minutes

1. **Duplicate the template**
   Open the template link from your delivery email. Click the ··· menu (top right) and choose **Duplicate** / **Duplicate to my workspace**. Work only in your copy.
2. **Clear or keep the examples**
   Every database ships with a few example rows so you can see how things connect. Look through them, then delete them (select rows → Delete) or overwrite them with your own data.
3. **Favourite the page**
   Click the star (☆) at the top so the template sits in your sidebar. On mobile, it then appears under Favourites.
4. **Build your Services Library**
   Replace the example services with your own offers: **Tier** (Good / Better / Best), **Price**, hours and deliverables.
5. **Add 1–3 case studies**
   In **Proof & Case Studies**, log past wins: problem → result → client quote.
6. **Write your first proposal**
   Duplicate the **Aurora Studios** proposal, rename it for your client, link the services you offer and rewrite each step.
7. **Send and set a follow-up**
   Set Status to Sent, fill the sent date and a **Follow-up Date** 2–4 days later.

> **Good to know:** fields with a formula or rollup fill in by themselves — you never type into them. If one shows empty, the linked data (relation, date or amount) it needs is missing.

How it works

Proposals (automatic)

- Status flow: Draft → Sent → Viewed → Accepted / Rejected.
- The package price adds up from the linked services by itself.
- **Follow up now** lists every open proposal whose follow-up date has come.
- The optional Win Rate chart tab uses Notion's 1 free chart — skip it if you've already used yours.

The 7-step proposal

- **1. Problem** — their situation in their own words.
- **2. Solution** — your approach; outcomes before process.
- **3. Why me** — one or two case studies from your Proof bank.
- **4. Deliverables** — exactly what they get. Vague scope causes scope creep.
- **5. Timeline** — realistic phases and dates.
- **6. Pricing** — a Good / Better / Best table. Most clients pick the middle.
- **7. Next step** — one clear action, e.g. "Reply 'Better' and I'll send the contract today."

Follow-up Scripts

- One message per stage: after the call, proposal sent, day-3 nudge, day-7 check-in, objections, lost, won.
- Copy, personalise the first line, send.

Your routine

New lead	Send the proposal within 24 hours — it roughly doubles your chances.
Every morning (1 min)	Check Follow up now and nudge with a script.
Monthly	Look at Accepted vs Rejected and adjust your packages and prices.

Pro tips

- Personalise the first paragraph with their words from the call. Template everything else.
- Follow up at least twice — most yeses come after a nudge.
- Click a Follow-up Date → turn on Remind so you never forget.

FAQ

Which Notion plan do I need?	The free plan. Every database, formula and view in this template works without upgrading.
Can I rename or add properties?	Yes. If you rename a property that a formula or rollup uses, Notion updates the reference automatically. Deleting such a property breaks the formula that depends on it.

Notion template · Version Oct 2026

Welcome

A shareable Notion page for each client: what's next, what needs their review, files, feedback, meetings and invoices — so nobody digs through email again.

What's inside

Freelancer setup	A 5-minute checklist at the top — delete it before sharing.
Project at a glance	Project, timeline, your contact details and key links.
Coming up / Ready for review	Next milestones and deliverables waiting for the client.
Milestones	The project journey phase by phase, also as a timeline.
Deliverables	Every file with its status.
Feedback & Blockers	Client feedback in one place, plus a feedback form and a Waiting on You view.
Meeting Notes	Every call summarised with decisions and next steps.
Invoices	Amounts, due dates and payment status.
FAQ	Client-facing answers on revisions, payments and contact.

Get started in 5 minutes

1. **Duplicate the template**
   Open the template link from your delivery email. Click the ··· menu (top right) and choose **Duplicate** / **Duplicate to my workspace**. Work only in your copy.
2. **Clear or keep the examples**
   Every database ships with a few example rows so you can see how things connect. Look through them, then delete them (select rows → Delete) or overwrite them with your own data.
3. **Favourite the page**
   Click the star (☆) at the top so the template sits in your sidebar. On mobile, it then appears under Favourites.
4. **One portal per client**
   Duplicate the portal page once for each client and rename it, e.g. "Acme × Your Studio".
5. **Fill in Project at a glance**
   Project, dates, your contact and the 3 key links (contract, brief, shared folder).
6. **Replace the sample rows**
   Add the real milestones, deliverables and invoices. Edit the FAQ: your email, revision rounds, payment terms.

7 **Share with the client**
Share → Invite your client with **Can comment** (recommended). Need them to add rows? Give **Can edit content** or send them the **Send feedback** form. Then delete the setup block.

Good to know: fields with a formula or rollup fill in by themselves — you never type into them. If one shows empty, the linked data (relation, date or amount) it needs is missing.

How it works

Milestones & Deliverables

- Milestones move Upcoming → In Progress → Done. Switch to Timeline to see them on a calendar.
- Set a deliverable to Ready for Review and it shows up at the top for your client.

Feedback & Blockers

- Clients leave feedback here (or via the form) instead of email.
- **Waiting on You** shows the client exactly what's blocking progress.

Invoices

- Status shows paid, pending or overdue — enter the paid date when money arrives.

Before you share

- Delete the setup block and the example rows; replace the sample email in the FAQ.
- Only invite the client — don't publish the page to the web unless you want it public.
- The Legal toggle at the bottom is for you; it tells clients they can ignore it.

Your routine

Day one	Send the client the portal link.
After every call	Add a Meeting Notes row with decisions and next steps.
When you deliver	Add the deliverable, set Ready for Review, tell the client in one line.
Weekly	Update milestones, resolve feedback, check invoices.

Pro tips

- Keep all feedback in the portal; politely redirect emailed feedback there.
- You may share your copies with your own clients — that's what it's for. Reselling the template is not allowed.

FAQ

Which Notion plan do I need?	The free plan. Every database, formula and view in this template works without upgrading.
Can I rename or add properties?	Yes. If you rename a property that a formula or rollup uses, Notion updates the reference automatically. Deleting such a property breaks the formula that depends on it.
What currency is used?	Amounts are plain numbers, so any currency works. If you want a symbol, open the property → Number format → pick your currency.
