Notion template · Version Oct 2026

Welcome

A reusable services library, Good / Better / Best pricing and a follow-up system that turns "I'll think about it" into a signature.

What's inside

Proposals	Every proposal from Draft to Accepted, with follow-up flags.
Services Library	Your packages, built once, reused in every proposal.
Proposal Page Structure	The 7-part flow every proposal follows.

Get started in 5 minutes

1. **Duplicate the template**
   Open the template link from your delivery email. Click the ··· menu (top right) and choose **Duplicate** / **Duplicate to my workspace**. Work only in your copy.
2. **Clear or keep the examples**
   Every database ships with a few example rows so you can see how things connect. Look through them, then delete them (select rows → Delete) or overwrite them with your own data.
3. **Favourite the page**
   Click the star (☆) at the top so the template sits in your sidebar. On mobile, it then appears under Favourites.
4. **Build your Services Library**
   Add your offers with **Tier** (Good / Better / Best), **Price**, **Est. Hours**, **Description** and **Deliverables**.
5. **Create a proposal**
   In **Proposals**, add a row with **Client Name**, set **Status** to Draft and link the offered packages under **Services**.
6. **Write the proposal page**
   Open the proposal row and write it using the 7-part structure below.
7. **Send and set a follow-up**
   Set **Status** to Sent, fill **Date Sent** and a **Follow-up Date** (2–4 days later).

> **Good to know:** fields with a formula or rollup fill in by themselves — you never type into them. If one shows empty, the linked data (relation, date or amount) it needs is missing.

How it works

Proposals (automatic)

- **Package Price** adds up the Price of all linked services.
- **Deal Value** is what the client actually agreed to — fill it in when they accept.
- **Follow-up Status**: 🔴 Overdue, 🟡 Today, 🟢 Upcoming — only for proposals still open (not Draft, Accepted or Rejected).
- Status flow: Draft → Sent → Viewed → Accepted / Rejected.
- Use **Objections & Notes** to record what the client pushed back on.

Proposal page structure

- **1. Problem** — their situation in their own words.
- **2. Solution** — your approach, outcomes before process.
- **3. Why Me** — one or two relevant proof points.
- **4. Deliverables** — exactly what they get. Vague scope causes scope creep.
- **5. Timeline** — realistic phases and dates.
- **6. Pricing** — three tiers. Most clients pick the middle; anchor high.
- **7. Next Steps** — one clear action, e.g. "Reply to confirm and I'll send the contract."

Services Library

- Open any service to see every proposal it was used in.
- Review prices every quarter — raise them on the tier clients pick most.

Your routine

Per proposal	Draft from the structure, link services, send, set a follow-up date.
Daily (1 min)	Check 🔴 Overdue / 🟡 Today follow-ups and nudge.
Monthly	Count Accepted vs Rejected, read your Objections notes, adjust offers.

Pro tips

- Send within 24 hours of the call while interest is high.
- Follow up at least twice — most yeses come after the first nudge.

FAQ

Which Notion plan do I need?	The free plan runs everything essential. Some view types (e.g. Charts) have limits on free plans; all core databases and formulas work without upgrading.
Can I rename or add properties?	Yes. If you rename a property that a formula or rollup uses, Notion updates the reference automatically. Deleting such a property breaks the formula that depends on it.
What currency is used?	Amounts are plain numbers, so any currency works. If you want a symbol, open the property → Number format → pick your currency.
Something isn't working?	Email info@templyworks.com with a screenshot. We fix setup problems quickly.
