SETUP & USER GUIDE

Client Pipeline

A freelancer-friendly CRM.

templyworks.com · info@templyworks.com

Notion template · Version Oct 2026

Welcome

Contacts, deals, calls, emails and follow-ups in one place — so a warm lead never goes cold again.

What's inside

Contacts	Every lead and client, with live pipeline value and last-contact date.
Deal Pipeline	Opportunities moving from Prospect to Closed Won.
Interaction Log	Every call, email, meeting and message — with follow-up flags.
Projects	Work you're delivering, linked to the client.

Get started in 5 minutes

1 **Duplicate the template**
Open the template link from your delivery email. Click the ··· menu (top right) and choose **Duplicate** / **Duplicate to my workspace**. Work only in your copy.

2 **Clear or keep the examples**
Every database ships with a few example rows so you can see how things connect. Look through them, then delete them (select rows → Delete) or overwrite them with your own data.

3 **Favourite the page**
Click the star (☆) at the top so the template sits in your sidebar. On mobile, it then appears under Favourites.

4 **Add your contacts**
In **Contacts**, add a row per person with **Company**, **Email**, **Status** (Lead / Active / Inactive) and **Source**.

5 **Create deals**
In **Deals**, add one row per opportunity, set **Value**, **Expected Close**, **Stage** and link the **Contact**.

6 **Log your last touchpoints**
In **Interaction Log**, add your most recent call/email per contact, link the **Contact** and set a **Follow-up Date**.

7 **Link active work**
When a deal closes, add a row in **Projects** and link the **Contact**.

> **Good to know:** fields with a formula or rollup fill in by themselves — you never type into them. If one shows empty, the linked data (relation, date or amount) it needs is missing.

How it works

Contacts (automatic)

- **Last Contacted** fills in automatically from the newest linked interaction — no manual date updates.
- **Pipeline Value** adds up the Value of every deal linked to this contact.
- Open any contact to see its **Deals**, **Interactions** and **Projects** in one place.

Deal Pipeline

- Stages: Prospect → Contacted → Proposal Sent → Negotiating → Closed Won / Closed Lost.
- Drag cards across the board view to move a deal forward.
- Keep **Expected Close** realistic — it is what you plan income around.

Interaction Log

- Set **Type** (Call, Email, Meeting, Message, Note) and write short **Notes**.
- **Follow-up Status** calculates itself: 🔴 Overdue, 🟡 Today, 🟢 Upcoming.
- Tick **Follow-up Done** when you've followed up — the flag disappears.

Projects

- Track **Start Date**, **Due Date**, **Budget** and **Status**.
- Linked projects appear on the contact's page automatically.

Your routine

Daily (2 min)	Filter Interaction Log for 🔴 Overdue and 🟡 Today. Send those follow-ups first.
After every call/email	Log it in Interaction Log and set the next Follow-up Date.
Weekly (10 min)	Move deal stages, update Expected Close, check contacts with an old Last Contacted date.

Pro tips

- Always set a Follow-up Date — a lead without a next step is a lead you'll forget.
- Use Source to see where your best clients come from, then double down there.
- Mark lost deals Closed Lost instead of deleting them — patterns show up over time.

FAQ

Which Notion plan do I need?	The free plan runs everything essential. Some view types (e.g. Charts) have limits on free plans; all core databases and formulas work without upgrading.
Can I rename or add properties?	Yes. If you rename a property that a formula or rollup uses, Notion updates the reference automatically. Deleting such a property breaks the formula that depends on it.
What currency is used?	Amounts are plain numbers, so any currency works. If you want a symbol, open the property → Number format → pick your currency.
Something isn't working?	Email info@templyworks.com with a screenshot. We fix setup problems quickly.
