Notion template · Version Oct 2026

Welcome

Every transaction, budget, bill, goal and account in one place — with your net worth and monthly numbers calculated for you. No spreadsheet anxiety.

What's inside

At a glance	Net worth, bills coming up and a budget check at the top of the page.
Transactions	Every income and expense, one row each. Views: This Month, All, Expenses, Income.
Budgets	A monthly limit per category — Spent, Remaining, Used % and Status update live.
Goals & Savings Pots	Savings targets with live progress.
Accounts & Net Worth	Every account and debt; net worth adds itself up.
Subscriptions & Bills	Recurring payments with a monthly cost and next payment date.
This month in numbers	Money in and money out for the current month, with totals.
Bonus (paid plans)	Optional charts and a visual dashboard. Everything else works on the free plan.

Get started in 5 minutes

1 **Duplicate the template**
Open the template link from your delivery email. Click the ··· menu (top right) and choose **Duplicate** / **Duplicate to my workspace**. Work only in your copy.

2 **Clear or keep the examples**
Every database ships with a few example rows so you can see how things connect. Look through them, then delete them (select rows → Delete) or overwrite them with your own data.

3 **Favourite the page**
Click the star (☆) at the top so the template sits in your sidebar. On mobile, it then appears under Favourites.

4 **Create your budgets**
In **Budgets**, add one row per spending category (e.g. Groceries, Dining, Transport) and enter a **Monthly Limit**.

5 **Add your accounts**
In **Accounts & Net Worth**, add each bank account, savings pot, credit card and loan with its current balance. Cards and loans count as debt automatically.

6 **Log your first transactions**
In **Transactions**, add name, **Amount** (always positive), **Type** (Income or Expense), **Category** and **Date**. For expenses, pick the matching **Budget**.

7 **Add goals and bills**
Enter target and current amount for each goal; enter amount, billing cycle and next payment for each subscription or bill.

Good to know: fields with a formula or rollup fill in by themselves — you never type into them. If one shows empty, the linked data (relation, date or amount) it needs is missing.

How it works

Transactions

- **Amount** is always a positive number. **Type** decides whether it counts as money in or out.
- Pick a **Budget** on every expense — that is what feeds the budget's **Spent** number.
- The **This Month** view only shows the current calendar month and switches over by itself.
- On mobile, add Finance HQ to Favourites — logging a coffee takes 10 seconds.

Budgets (automatic)

- **Spent** = linked expenses dated this month. It resets when a new month starts.
- **Remaining** = Monthly Limit − Spent. **Used %** shows how much of the limit is gone.
- **Status**: ● Healthy, ● Watch when you get close, ● Over when you pass the limit.
- Income never counts toward a budget.

Accounts & Net Worth

- Update balances once a month. Credit cards and loans are counted as debt automatically.
- The **Net worth** table at the top of the page shows the total at the bottom of the column.

Subscriptions & Bills

- Yearly plans are converted to a monthly cost, so you see what you really pay.
- Click a **Next Payment** date → turn on **Remind** to get a notification before it's charged.

This month in numbers

- Money in and Money out list this month's transactions with the total at the bottom.
- Want last month? Open Transactions → All and filter by date.

Your routine

When it happens (10 sec)	Log a transaction.
Weekly (2 min)	Check this page: budget status and bills coming up.
Monthly (5 min)	Update account balances and goal amounts; check subscriptions for anything to cancel.

Pro tips

- Freelancer? Each time a client pays, move 25–30% to a Tax reserve account and update the goal.
- Create a budget called "Other" so no expense goes untracked — and merge categories that don't change your decisions.
- Not financial advice — the template organises your numbers, decisions stay yours.

FAQ

Which Notion plan do I need?	The free plan. Everything works free; only the optional charts in the Bonus toggle need a paid Notion plan.
Which currency does it use?	Any. Amounts are plain numbers — use your own currency.
Does it connect to my bank?	No. You add transactions yourself, so nothing is shared with anyone.
Something isn't working?	Email info@templyworks.com with a screenshot. We fix setup problems quickly.
