Notion template · Version Oct 2026

Welcome

Every deadline across every client, project health that calculates itself, quoted vs real hours — and a scope log so "small extras" finally get paid.

What's inside

This week	Tasks due in the next 7 days and active projects, at the top of the page.
Projects	One row per project. Health, Progress and Logged Hours calculate themselves.
Tasks	Work broken into phases; anything late turns red automatically.
Scope Changes	Extra requests with a price — approved fees roll up into the project.
Time Log	Every hour you work, with rate and billable total.

Get started in 5 minutes

1. **Duplicate the template**
   Open the template link from your delivery email. Click the ··· menu (top right) and choose **Duplicate** / **Duplicate to my workspace**. Work only in your copy.
2. **Clear or keep the examples**
   Every database ships with a few example rows so you can see how things connect. Look through them, then delete them (select rows → Delete) or overwrite them with your own data.
3. **Favourite the page**
   Click the star (☆) at the top so the template sits in your sidebar. On mobile, it then appears under Favourites.
4. **Create a project**
   In **Projects**, add the project with client, start date, due date and **Quoted Hours**.
5. **Break it into tasks**
   In **Tasks**, add tasks, link each to the project, and set phase and due date.
6. **Log your time**
   In **Time Log**, add an entry per work session with hours, date, project and rate.

> **Good to know:** fields with a formula or rollup fill in by themselves — you never type into them. If one shows empty, the linked data (relation, date or amount) it needs is missing.

How it works

Projects (automatic)

- **Progress** = share of linked tasks that are done.
- **Logged Hours** adds up the Time Log. Compare it with **Quoted Hours** to protect your budget.
- **Health**: ● On Track, ● At Risk, ● Overdue — from deadline, progress and hours.
- Views: board by status, **Timeline** for deadlines side by side, and by client.

Tasks

- Phases: Discovery → Design → Review → Delivery.
- Any task past its due date and not done is flagged automatically.
- Click a task's Due Date → turn on **Remind** to get a notification.

Scope Changes

- Client asks for "one small extra"? Log it, put a price on it, and only start when **Client said yes** is ticked.
- Approved fees roll up into the project automatically.

Time Log

- Log time the same day — memory gets expensive by Friday.
- Log non-billable time too (admin, revisions) to see where time really goes.

Your routine

Every morning (2 min)	Open This week and pick today's tasks.
As you work	Tick tasks as you finish them — progress and health update by themselves.
End of day (1 min)	Log your hours.
At project end	Compare Logged vs Quoted Hours and price the next job from it.

Pro tips

- Never say "sure, no problem" to extras. Say "Happy to — I'll send a quick quote" and log it in Scope Changes.
- Retainer clients? Create the monthly tasks once, then duplicate them each month and change the dates.
- If Logged Hours beat Quoted Hours by 30%, quote 30% more next time.

FAQ

Which Notion plan do I need?	The free plan. Every database, formula and view in this template works without upgrading.
Can I rename or add properties?	Yes. If you rename a property that a formula or rollup uses, Notion updates the reference automatically. Deleting such a property breaks the formula that depends on it.
What currency is used?	Amounts are plain numbers, so any currency works. If you want a symbol, open the property → Number format → pick your currency.
Something isn't working?	Email info@templyworks.com with a screenshot. We fix setup problems quickly.
